ROOF ROT

NESTING
BIRDS

Embers - not flames - are the cause of up to **90%** of homes lost in wildfires. SolEmber™ provides a durable, code-compliant shield that blocks embers, debris, and pests from entering vulnerable areas **under rooftop solar arrays**.

Embers can travel up to a **MILE ahead** of flames igniting accumulated wildfire debris

SolEmber's durable stainless-steel mesh prevents embers from igniting flammable debris left under your solar panels by birds and other pests. SolEmber delivers safety and peace of mind, by hardening your property against one of the fastest-growing wildfire threats.

ENGINEERED TO STOP EMBERS
